# Photovoltaics (PV) Solar electricity for homes

## 5 Easy Steps to Go Solar:

1. Contact SPI Go Green LLC to request a free site visit. We will arrange to visit you and determine your home's solar potential.
2. After analyzing your electricity bills, we will recommend a solar system that best meets your needs and budget.
3. Upon signing a purchase contract, your authorized installer will prepare and submit your application for a cash rebate on your solar system.
4. Your solar contractor will install your system and acquire all necessary permits and approvals.
5. Receive your rebate check from the state, start-up your new system and begin producing your own clean, solar electricity!

## Business Applications

Consider solar power for your business. A solar system can help improve your bottom line. The incentives for commercial systems are even higher than residential systems. Ask us for a cost-savings analysis for your business today!

## So Many Reasons to Go Solar!

Whether you are seeking relief from ever-increasing utility electric rates, or you just want to do your part to help stop global warming, there is a great reason to install a solar system on your home today.

- Reduce or eliminate your electric bill
- Fix your electricity cost today
- Hedge against utility rate hikes
- Increase the value of your home without increasing property taxes
- Generate your own clean power on site
- Fight global warming by reducing your personal carbon footprint
- Reduce America's dependence on foreign oil
- Enjoy reliable energy—PV systems have no moving parts, 40-year design life and 25-year warranty
